Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance:

Claims 122-125 and 127-154 are allowable in view of applicant's amendment filed on April 29, 2003 and the examiner's amendment. The closest prior art in the record are Kris *et al.*, (US Patent No. 6,238,869, filed on June 21, 1999), Felder *et al.*, (US Patent No. 6,232,066, filed on July 2, 1998), Zhao (US Patent No. 6,448, 010, priority date: October 6, 1999), Shah *et al.*, (US Patent No. 5, 629,156, filed on December 29, 1994), and Nielson *et al.*, (US Patent No. 5,773,257, published on Jun 30, 1998). These prior art do not teach to detect a mutation or SNP which is a terminal nucleotide of said one or more probes in step d) of claim 122 and step c) of claim 140. These prior art either alone or in combination with the other art in the record does not teach or reasonably suggest a method of detecting a mutation or single nucleotide polymorphism and a method of detecting at least one RNA molecule in a survey population of RNA molecules which comprise all of the limitations recited in claims 122 and 140. Note that, according to the definition of "uniform" in the dictionary, uniform number of bases in step c) of claim 140 is considered as the same number of bases.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
